

Consumer Credit Trends

The screenshot shows a web browser window displaying the Consumer Financial Protection Bureau (CFPB) website. The address bar shows the URL <http://content.consumerfinance.gov/data-research/cc>. The page header includes the CFPB logo, navigation links for 'Consumer Tools', 'Educational Resources', 'Data & Research', 'Policy & Compliance', and 'About Us', a search bar, and a 'Submit a Complaint' button. The main content area has a teal background with the heading 'Consumer credit trends' and the subtext 'Explore recent developments in consumer credit markets.' To the right of this text is a bar chart with an orange line graph overlay. The bar chart has five bars of varying heights, with the first two being dark teal, the third white, and the last two light teal. The orange line graph starts at a low point, rises to a peak above the second bar, dips below the third bar, rises again above the fourth bar, and ends at its highest point above the fifth bar. There are also small plus and minus signs scattered around the chart. Below the teal section, there are two columns of text: 'Market dashboards' and 'About us'. The 'Market dashboards' section explains that the dashboards are based on a sample of credit records with identifying information removed. The 'About us' section describes the CFPB as an independent federal agency. The bottom of the screenshot shows a Windows taskbar with various application icons and a system tray showing the time as 6:14 PM.
